

PRESS RELEASE

FOR IMMEDIATE RELEASE

Dage XD7600NT offers 2.0 mega pixel digital X-ray inspection

May 2, 2007, Fremont, California – Dage Precision Industries the global leader in X-ray inspection technology, announces that its XiDAT XD7600NT digital x-ray inspection system is now equipped with a standard 2.0 mega pixel imaging system.

Dage has set a new global standard for X-ray inspection technology with the XD7600NT. Its innovative look and manipulator design provides oblique angle viewing of up to 70-degrees for any position 360-degrees around any point of the entire 18" x 16" (458 x 407 mm) inspection area allowing the XD7600NT to inspect all interconnections and PCBs containing BGA and CSP devices.

The XD7600NT comes standard with the Dage NT250 x-ray tube with 250 nanometers sub-micron feature recognition and real-time digital inspection at 2.0 mega pixel viewed on a 24" flat panel LCD display with up to 9,200X magnification. The superior image quality and enhanced feature recognition of the Dage NT250 x-ray tube combined with the XiDAT 2.0 imaging system and its easy to use ImageWizard software provides world class inspection quality.

The XD7600NT can be equipped with a computerized tomography (CT) option providing 3D modeling and volumetric measurement of solder joints. It can be easily converted between 2D and 3D modes making it a common platform for analytical analysis of solder interconnections for critical applications such as stacked die, MEMS, package-in-package and package-on-package.

With Americas headquarters located in Fremont, California, Dage Precision Industries, Inc. manufactures and supports a complete range of award winning digital x-ray inspection systems and bond test equipment for the printed circuit board assembly and semiconductor industries.
