Aqueous Technologies to Showcase Simple Green Stencil and Misprint Cleaner at SMTA International 2007

Rancho Cucamonga, CA — Aqueous Technologies Corporation announces that it will exhibit Simple Green Stencil and Misprint Cleaner in booth 205 at the upcoming SMTA International exhibition and conference, scheduled to take place October 7-11, 2007, in Orlando, FL.

Simple Green Stencil and Misprint Cleaner combines exceptionally effective results with a high level of user and environmental safety associated with Simple Green products.

Michael Konrad, president of Aqueous Technologies, said, “Simple Green Stencil and Misprint Cleaner is simply the best solder paste remover we have ever seen. I have never before seen a stencil cleaning chemical clean so quickly and rinse so effortlessly.”

Simple Green Stencil and Misprint Cleaner is designed for use in immersion stencil cleaning systems such as ultrasonic stencil cleaners and is also available in a trigger spray for manual stencil cleaning applications.

Offering lower health and safety risks than traditional solvent-based cleaners, and better cleaning efficiency than current aqueous-based cleaners, Simple Green® Stencil Cleaner & Solder Paste Remover tops other products on the market for speed, efficacy, safety, and environmentally correct formulation and complies with the most stringent (SCAQMD) VOC regulations when used as directed.
