Christopher Associates Expands Engineering Team

April 2010 — Christopher Associates Inc., one of North America's leading high technology engineering services and distribution companies, today announced the addition of Bruce L. Barton to the company's applications engineering team.

Mr. Barton has over 20 years experience in high technology manufacturing in troubleshooting, process and product development, training and customer support. His extensive knowledge of a wide range of manufacturing processes and technologies will complement Christopher Associates' nationally recognized expertise in the printed circuit fabrication and assembly workspace, as well as green technologies, including photovoltaic manufacturing.

Mr. Barton's commitment to improving process yields and manufacturing efficiency has been recognized by a number of industry awards. He is also a Six Sigma black belt.
