## **SUN CHEMICAL CIRCUITS EXPANDS TEAM IN NORTH AMERICA**

**Midsomer Norton, England** – May 17, 2007 - Sun Chemical Circuits, one of the world's leading suppliers of inks and resists to the printed circuit board (PCB) manufacturing industry, has expanded the technical sales team for its Circuits business in North America following an increase in turnover during 2006.

Scott Mcleod joins the Sun Chemical Circuits team with extensive experience in supplying products to the PCB industry. Based in Minnesota, his key objectives include driving continued growth of market share in North America and providing technical sales support to current customers.

Mcleod said: "I look forward to the challenge of developing the Circuits business further. We will continue to focus on our core business of supplying ink products to the PCB market, and at the same time, develop new products."

Richard Martin, Global Vice President, Sun Chemical Screen & Circuits, said: "Our share in the North American Circuits market showed good growth again last year, and we will be working hard to build on this success. The expansion of the team is another demonstration of our commitment to the market, and will allow us to continue to provide a high level of support and expertise to our customers in North America."

Sun Chemical Circuits has been a supplier of inks and resists to the PCB industry for over 45 years and continues to adapt to the changing demands from its customers and OEM requirements.
