

Press Release

FlexLink Systems opens Engineering office in Wisconsin

Following the creation of a global business unit to focus on the paper converting industry, FlexLink has opened an engineering office in Appleton, WI.

Establishing the engineering office in Appleton is key to our strategy of providing excellent support to our strong customer base in this region, says Kevin Donahue, Business Unit Manager for Paper Converting. The office is staffed with Applications, Controls, and Project Engineers who possess expertise and knowledge of FlexLink's Dynamic Flow Diverters and other devices for the paper converting industry. This group will provide a sound foundation for future growth and acquisitions in this industry segment. Office contact information is as follows:

FlexLink Systems, Inc.
54 Park Place
Suite 400
Appleton, WI 54914
PH: 920-560-3161
FX: 920-560-3163
