ICON Technologies Celebrates 5-Year Anniversary

ICON Technologies announces its five-year anniversary. With its' indirect sales channels, ICON offers an extremely cost-effective and proven print platform coupled with superior, timely and localized agent service. The company continues to enjoy growth in China and overseas, particularly in Australia, India, Korea and South East Asia.

Since its launch in 2005, the Icon i8 printer has received Global Technology Awards in the category of Best Product - Asia for five consecutive years. ICON has continued to improve and innovate with the current Icon i8 platform. The i8 is one of the most accurate and repeatable printers on the market, and the printer can accommodate a wide process window for a robust high-performance print process.

CEO Simon Leow stated, "We launched our first and inaugural i8 inline printer five years ago at NEPCON South China. During this journey, we have successfully risen to the occasion during difficult times and never falter from our mission of providing the most reliable and cost effective print solutions. We would like to thank our customers, distributors and team members for support and will continue to reach for higher heights."

The ICON team and its distributors have earned a good reputation through a positive attitude and a steadfast dedication to customer satisfaction. ICON's service philosophy is that service does not end with a machine sale and installation, but only begins there. ICON builds its service support system according to international standards, including a strict training system, comprehensive process support and spare warehouses distributed in different regions.
