Indium Corporation Sales Engineer Offers SMTA Certification Program in Chinese

Indium Corporation's David Hu Di has led the first Chinese language technical training and SMTA Certification course at Nepcon South China 2007 in Shenzhen.

Until now, SMTA certification classes in China have been taught by English speaking instructors. This Chinese language program makes SMTA certification easier to achieve for Chinese-speaking engineers.

David, bilingual in Chinese and English, is able to teach in his native Chinese language as well as in English, making it easier for the SMTA to provide certification classes to engineers throughout China and the rest of the world.

David, a Senior Sales Engineer for Indium Corporation since 2005, is based in Suzhou, China.

Indium Corporation is a premiere materials supplier to the global electronics assembly, semiconductor fabrication and packaging, solar photovoltaic, and thermal management markets. Founded in 1934, the company offers a broad range of products, services, and technical support focused on advanced materials science. With facilities in the PRC, Singapore, the United Kingdom, and the USA, the company is a four-time Frost & Sullivan Award winner and registered to ISO-9001.

The SMTA is an international network of professionals who build skills, share practical experience and develop solutions in electronic assembly technologies, including microsystems, emerging technologies, and related business operations. The SMTA certification program is unique to the industry as it recognizes and certifies the entire SMT assembly process at an engineering level.
