

MIRTEC REPORTS 66 PERCENT GROWTH H1 FISCAL 2010

FOR IMMEDIATE RELEASE:

OXFORD, CT - August 2010 - MIRTEC Corp. announced that sales revenue for its North American Sales and Service Division grew by more than 66 percent for the first six months of fiscal 2010 with respect to 2009 results.

Brian D'Amico, President of MIRTEC Corp., attributes this remarkable growth to the industry-wide acceptance of MIRTEC's MV-7 In-line AOI product series. "MIRTEC's revolutionary MV-7 product line has found widespread acceptance among OEM and EMS providers throughout North America, thus enabling MIRTEC to establish a leadership position in this highly competitive market," said D'Amico. "This, combined with an extremely talented team of sales and support professionals, has fueled the tremendous growth of our organization."

MIRTEC's competitive advantages include leading edge technologies, a diversified customer base, and vertical market exposure along with an expanded geographic presence. MIRTEC products have been extremely successful in high-volume markets including cell phone and MP3 player manufacturing, as well as low-volume high-mix markets such as medical, automotive, aerospace and defense.

"Manufacturers have become increasingly more selective in purchasing equipment that will add value to their business and provide them with a much needed competitive edge," continued D'Amico. "We at MIRTEC are extremely focused upon advancements within the electronics manufacturing industry as well as the ever-changing requirements of our valued customers. Our company invests heavily in Research and Development, persistently focused on using state-of-the-art optics, lighting and laser technology to develop the industry's most technologically advanced inspection solutions. Our goal is quite simple: to be the number one supplier of inspection solutions to the electronics manufacturing industry. The only way to get there is to stay not one, but THREE steps ahead of the competition!"
