Medway, MA — August 2010 —Milara Inc., a leader in stencil printing technological innovation, has appointed Laryo as its representative throughout Italy. Laryo opened its doors in 2000 as a distributor and rapidly broke into the electronics manufacturing market, establishing itself as a valid supplier to small and mid-sized businesses.

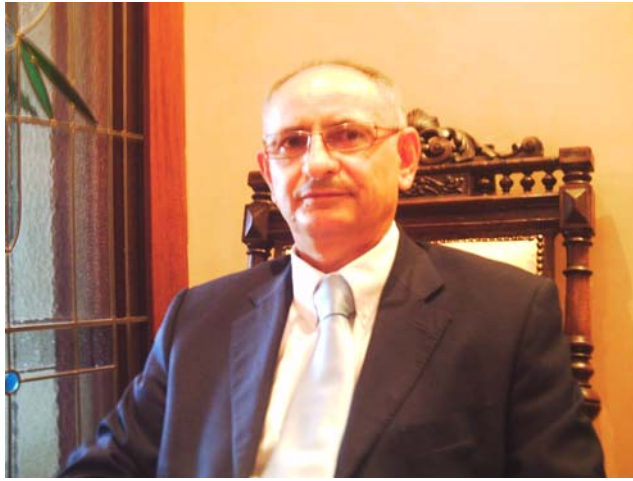

Since its founding, Laryo acquired distribution rights for some very important brands, allowing the company to develop and approach a great deal of corporate production. Laryo guarantees quality technical assistance to all of its clients by making the most up-to-date technical training a high priority for its staff.

The partnership between Laryo and Milara in Italy will provide customers with local support from an established organization. Both companies are leaders in the industry and this new partnership will provide customers with the highest level of technical support. As Milara continues to expand its range of printer systems and with new developments on the horizon, both companies will be able to capitalize on these new opportunities.

“We are pleased to have acquired the services of Laryo to help promote our products in Italy. We have been searching for a viable representative in that area for quite some time and are quite satisfied with Laryo’s offerings, having more than 10 years of experience with product installation and support. Its overall business acumen seems to be quite in line with ours,” said Stephen Brodeur, Program Director at Milara Inc.

Laryo will represent Milara’s line of fully and semiautomatic printers for the SMT and semiconductor industries throughout Italy. For more information about Laryo’s products and services, contact Vincenzo Sgambetterra at +39.0200610260 or on the Web at www.laryo.it.
