## **PROMATION to Display LABEL MASTER at APEX**

**PLEASANT PRAIRIE, WI — February 12, 2007 — PROMATION Inc.**, a leading manufacturer of PCB handling solutions for electronics manufacturing, announces that it will display Label Master station in booth 1003 at the upcoming APEX 2007 tradeshow and exhibition, scheduled to take place February 20 to 22, 2007, in Los Angeles.

**PROMATION's** Label Master system is an in-line, print on demand label “pick-and-place” station that can be configured to use either the customer’s pre-printed label rolls or can print “on demand” labels (based on select criteria) then have them placed onto the PCB.

The station can accurately place labels ranging from 7 x 7 mm up to 40 x 40 mm onto PCBs, through the use of an X/Y gantry and easy to use touch panel interface.

For more information about this station, visit the company at **Booth 1003** or contact your local sales representative or **PROMATION** directly at:
