## FOR IMMEDIATE RELEASE

### **Dage XD7500VR offers sub-micron digital X-ray inspection**

*March 27, 2007, Fremont, California* – Dage Precision Industries the global leader in X-ray inspection technology, announces that it's XiDAT XD7500VR digital x-ray inspection system is now available with sub-micron inspection capability at a price point of most 2 micron systems.

Dage has set a new global standard for X-ray inspection technology with the XD7500VR that provides superior performance by offering sub-micron inspection capability combined with the features of the award winning XiDAT (x-ray integrated digital acquisition technology). Its innovative look and manipulator design provides oblique angle viewing of up to 70-degrees for any position 360-degrees around any point of the entire 18" x 16" (458 x 407 mm) inspection area.

The XD7500VR comes standard with the Dage VR160 x-ray tube offering sub-micron feature recognition to 950 nanometers, real-time digital inspection achieved at 1.3 mega pixel viewed on a 20" flat panel LCD display and geometric magnification up to 5,650X. As an available option, the XD7500VR is available with the Dage XiDAT 2.0 image acquisition system providing real-time digital inspection at 2.0 mega pixel viewed on a 24" flat panel LCD display with up to 7,400X geometric magnification. As with all Dage X-ray inspection systems, the XD7500VR is equipped with Dage's award winning and easy to use ImageWizard software providing world class inspection quality.

With US headquarters located in Fremont, California, Dage Precision Industries, Inc. manufactures and supports a complete range of award winning digital x-ray inspection systems and bond test equipment for the printed circuit board assembly and semiconductor industries.
