### **Techcon Systems Announces Solutions for Aerospace Industry**

**Garden Grove, CA — July 2010** — Techcon Systems, a product group of OK International and a leading provider of fluid dispensing systems and products, is pleased to announce that its plastic adhesive tools are ideal for smoothing sealants and adhesives for many aerospace applications. With sealant scrapers manufactured from Celcon®, and spatulas from glass-filled Nylon, these unique tools guarantee not to damage delicate substrates found in the aerospace industry.

The TS1275-4 Celcon® Scraper has a convenient 0.75" (19mm) working area and is ideal for scraping sealants off of areas requiring rework or tidy-up. Such areas include the exterior pressurized fuselage skin, such as lap joints, butt joints, antenna cutouts, wing-to-body fairings, and around window forgings. For user comfort, the scraper side edges have been smoothed off. A hanging-hole located at the handle end allows the scraper to be easily stored away when not in use.

Techcon's TS1275-KP Spatulas are available individually, or in a three-piece kit. The spatulas can be used for a wide range of tasks, including smoothing and scraping adhesives, as well as mixing multi-component adhesives. Each end of the spatula is equipped with a molded head so that a variety of applications can be performed without the need to change tools.

For more information about Techcon Systems' plastic adhesive tools, visit [www.techconsystems.com](http://www.techconsystems.com).

###

**About Techcon Systems**

Techcon Systems was established in 1961 to service industrial manufacturing markets and has continued to be a leader in fluid dispensing systems and products. In 1996, OK International acquired Techcon Systems, providing a strong global sales channel, with direct subsidiaries in France, Germany, Italy, UK, China, and Japan. Today, Techcon represents OK International's OEM Division of products. Currently focusing on fluid dispensing systems, Techcon's components are used in medical, automotive, telecommunications, aerospace, and industrial applications worldwide, helping improve manufacturing processes and increase the customers' bottom lines. Techcon offers an array of fluid dispensing products and provides dispensing components ranging from disposable accessories to complete microprocessor-controlled dispensing systems, and precision valves. For more information, visit the company at [www.techconsystems.com](http://www.techconsystems.com).
