Acculogic Wins a Global Technology Award for the FLS980LXi Flying Probe Tester

Markham, ON — October 2014 — Acculogic Inc., a global leader in electronic production test solutions, announces that it was awarded a 2014 Global Technology Award in the category of Test Equipment for its FLS980LXi Flying Probe Tester. The award was presented to the company during a Tuesday, Sept. 30, 2014 ceremony that took place at the Donald Stephens Convention Center in Rosemont, IL during SMTA International.

An important limitation of currently available flying probe testers is the size of the units (UUTs) that can be tested by them. As a result, manufacturers of backplanes, test interface units, server boards, and large and heavy boards need to deploy other test equipment and costly techniques for product manufacturing verification.

Now, with the introduction of Acculogic's FLS980LXi flying probe tester, offering a test area of 32" x 38", extra-large UUTs can be accurately and reliably tested. Furthermore, the system is capable of reliably probing target sizes as small as 100 microns (4 mils), which is substantially smaller than today's state of technology of 600 microns / 25 mils. The FLS980LXi uses highly repeatable closed loop linear motor drives and joystick-like variable angle probe modules to maximize physical access and guarantee repeatable probing of fine-pitch devices and small components such as 01005s.

Premiering in 2005, the Global Technology Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts. For more information, visit www.globalsmt.net/awards.

About Acculogic Inc.

Acculogic is a global supplier of automatic test equipment and application support services. Acculogic's test products include the Flying Scorpion - world's only double sided Flying Probe with 3-D joy-stick-like probe motion and 22 probes , an extensive line of bed-of-nails In-Circuit Test Systems, a powerful suite of Boundary Scan test and programming tools, and Application Specific PXI/LXI based Functional Test Systems. Acculogic systems are used by manufacturers of electronic devices and circuit assemblies. Acculogic is a private, growing and profitable company with operations in United States, Canada, Mexico, Germany, France, Japan and an extensive network of sales and supports centers around the world. For more information about Acculogic, visit www.acculogic.com.
