CyberOptics' Flagship SE600™ SPI System Wins 3rd Consecutive Award at NEPCON South China

CyberOptics Corporation (Nasdaq: CYBE) announces that it was awarded Best Exhibit Technology Award for its brand-new SE600™ 3D SPI. The SMTA South China Chapter presented the award during the recent NEPCON South China expo that took place August 27-29, 2013 at the Shenzhen Convention & Exhibition Center in China.

SE600™ - CyberOptics' flagship SPI system, is the most advanced, high performance system ever. It brings together best accuracy and world-class usability on a single platform - making it the most ideal inspection solution for automotive, medical, military and other top niche markets. The SE600™ comes with a standard dual illumination sensor designed to offer the best repeatability and reproducibility – even on the very smallest paste deposits. The award-winning SPIv5.0 software on SE600™ offers full touch screen capability and world-class user experience for easy, flawless inspection. The newly-designed software includes multi-touch, easy pan, zoom in and out, multi-selection, unlimited undo-redo options and much more to enable simplified operation and quick programming.
