

## Lord 810 Acrylic Adhesive now available from Ellsworth Adhesives Europe

Ellsworth Adhesives Europe, leading distributor of adhesives and adhesive dispensing equipment, is pleased to confirm availability of the Lord Corporation's acrylic adhesive system, Lord 810/20.

The Lord 810/20 Acrylic Adhesive System has been designed to eradicate the problem of 'read-through' where the surface of a bonded substrate has become visibly distorted because of stresses that occurred during the curing process.

The issue of bond-line read-through can be a particular trouble for OEM's requiring a high quality pristine finish. For example, automotive manufacturers cannot accept a finish that has a visible adhesive line and since these manufacturers are increasingly using adhesives as an alternative to welding, new products such as Lord 810 are being developed in order to meet their sophisticated requirements.

Lord 810 Adhesive works in conjunction with Lord Accelerator 20 and upon curing, creates a flexible system for bonding metals and engineered plastics. This adhesive system provides a high speed cure, and strong bonding with virtually no bond-line read through. Furthermore, the use of Lord Accelerator 20 enables precise control of the adhesive bond-line thickness thanks to the glass beads in the material.

With little to no substrate preparation required, Lord 810 even remains in position when applied on vertical or overhead surfaces, facilitating greater process flexibility. Lord 810 provides impressive environmental resistance to UV exposure and weathering and also has the ability to resist dilute acids, alkalis, solvents, greases, oils and moisture.

Lord 810 is available to order from Ellsworth Adhesives Europe immediately and comes in 50ml, 200ml, 400ml and 5 gallon drums. To make an enquiry about this Lord adhesive, please email [infoeurope@ellsworth.com](mailto:infoeurope@ellsworth.com)

*Ellsworth Adhesives Europe is an official distributor of Lord Structural Adhesives and Electronic Materials. To learn more about these Lord product lines, visit: <http://www.ellsworthadhesives.co.uk/manufacturers/lord>*

## About Us

Ellsworth Adhesives is a global distributor of adhesives, specialty chemicals and adhesive dispensing equipment.

With over 40 years of industry experience, Ellsworth Adhesives is a supplier you can trust. Over the past four decades, the company has built an extensive portfolio of products and has earned a reputation for providing customers with an accurate and timely delivery. The expert Sales Team at Ellsworth Adhesives has unrivalled technical knowledge and will identify a solution that is tailored to the customer's specific needs.
