Aven's Deluxe 2-in-1 Soldering/De-Soldering Station with Premium Features

Aven's 2-in-1 Soldering/De-Soldering Station features a soldering iron and de-soldering gun in one compact unit. This station is intended for general purpose soldering as well as specialized lead-free soldering applications. This deluxe station is designed for a wide temperature range (160°-480°C or 320°-896°F) and the soldering iron tool heats rapidly from room temperature **to 350°C in as little as 30 seconds**. With its high-quality sensor, the heat exchange system guarantees precise temperature control at the soldering tip. Dual LCD displays show temperature information for both the soldering iron and de-soldering gun. The de-soldering gun easily melts and vacuum suctions debris into the storage chamber.

Aven's 2-in-1 Soldering/De-Soldering Station includes the following items:

- 200W soldering iron and 130W de-soldering pump
- Sponge and coiled brass tip cleaner
- Durable iron holder secures heated iron and gun between uses
- Includes standard pointed tip and standard de-soldering tip

For more information, call (734) 973-0099, view Aven's [2-in-1 Soldering/De-Soldering Station video](#), or click [here](#) to see it on our website.

Aven, Inc. manufactures and distributes high-performance optical instruments and precision tools for microscopy, inspection and assembly.

A technology innovator since 1983, Aven is located in a high-tech corridor of Southeast Michigan.
