

Ucamco's free Reference Gerber Viewer v2.8 displays component information

Version 2.8 of the Reference Gerber Viewer is now available at gerber-viewer.ucamco.com

Peter Vermeulen, lead developer of the Reference Gerber Viewer, explains: "For version 2.8 of the Reference Gerber Viewer our focus was ease of use and especially ease of learning. Plenty of users of the viewer need it only from time to time, and for them it is of paramount importance that it is very intuitive."

Karel Tavernier, Managing Director of Ucamco adds: "The Reference Gerber Viewer now displays all the meta-information contained in Gerber X2 files: the layer structure, where the via pads are, the CAD netlist, component reference descriptor and pin number of all the pads. If you want to find out what extra information is contained in an X2 file, check the X2 files in the Reference Gerber Viewer. We feel it is the best online X2 viewer."

The Reference Gerber Viewer is a cloud-based on-line web service. There is no software to download, install and maintain - it is always up to date. It is kept simple and easy to learn. It offers the following benefits:

- *For developers*, it provides a reliable verification of Gerber output software.
- *For creators of Gerber files*, it provides a reliable check of the generated Gerber and NC files.
- *For recipients of Gerber files*, it provides an accurate way to validate the input and arbitrate in discussions about the interpretation of a file.

Ucamco provides the Reference Gerber Viewer - free of charge - at gerber-viewer.ucamco.com. All organizations in need of a Gerber file viewing/verification service are welcome to provide weblink to this address.

About Ucamco

Ucamco (formerly Barco ETS) is a market leader in PCB CAM software, photoplotting and direct imaging systems, with a global network of sales and support centers. Headquartered in Ghent, Belgium, Ucamco has over 25 years of ongoing experience in developing and supporting leading-edge photoplotters and front-end tooling solutions for the global PCB industry. Key to this success is the company's uncompromising pursuit of engineering excellence in all its products. Ucamco also owns the IP rights on the Gerber File Format through its acquisition of Gerber Systems Corp.
