AIM to Highlight REL Alloys at SMTA International Expo

September 10th, 2019 — Cranston, Rhode Island USA – AIM Solder, a leading global manufacturer of solder assembly materials for the electronics industry, is pleased to announce their participation in the upcoming SMTA International Expo taking place on September 24-25, 2019 at the Donald E. Stephens Convention Center in Rosemont, IL. AIM Solder will highlight its REL electronic solders and its new RX18 and CX18 cored solder wire.

REL61™ & REL22™
AIM's High Reliability Alloys

REL22™ is an award-winning, high reliability alloy developed to address reliability and production quality issues common to similar multi-element alloys. Both internal and customer testing has proven that REL22 improves product survival in extreme thermal exposure operating environments such as under-hood automotive, avionics/aerospace and LED lighting. REL61™ is ideally suited for industries which require a cost effective alternative to SAC305 with no loss of processing performance or durability. REL61 provides significant advantages over other no-low silver alloys by offering better flow characteristics at lower temperatures, thus reducing PCB damage and assembly costs.

AIM will also feature its new cored wire solders, RX18 and CX18. The award-winning RX18 is engineered for automated soldering and promotes thermal transfer, fast wetting and reduces voids/skips. With an operator friendly, low odor/smoke formula, CX18 extends the solder tip life and leaves clear, minimal residues.

To discover all of AIM's products and services, visit the company at the SMTA International Expo in Booth # 406 for more information and to speak with one of AIM's knowledgeable staff members.

About AIM

Headquartered in Montreal, Canada, AIM Solder is a leading global manufacturer of assembly materials for the electronics industry with manufacturing, distribution and support facilities located throughout the world. AIM produces advanced solder products such as solder paste, liquid flux, cored wire, bar solder, epoxies, lead-free and halogen-free solder products, and specialty alloys such as indium and gold for a broad range of industries. A recipient of many prestigious SMT industry awards, AIM is strongly committed to innovative research and development of product and process improvement as well as providing customers with superior technical support, service and training. For more information about AIM, visit www.aimsolder.com.

Upcoming Events:

October 8, 2019 – SMTA New England, Foxboro Regency Hotel & Conference Center, Foxboro, MA

October 12, 2019 – SMTA Austin (CTEA), Norris Conference Center, Austin, TX

October 23-24, 2019 – SMTA Guadalajara, Expo Guadalajara, Jalisco, Mexico
