

Aegis Software Brings Smart Factory Technology to SMTA International Show with FactoryLogix MES Software

HORSHAM, PA (September 7, 2017) — Aegis Software, a global provider of [Manufacturing Execution Software](#) (MES), announced today that they will be showcasing their FactoryLogix software solution at [SMTA International 2017](#) in Rosemont, IL, September 19-20 in booth #211.

FactoryLogix provides manufacturers with immediate visibility into the [state of their factory](#) allowing them to prioritize resources, reduce risk, and increase overall efficiency. Harnessing and interpreting business data is key to scalable growth in today's digital-driven market, and a real-time MES platform offers actionable intelligence to guide operational decision making.

With program tracks on global technical innovation and factory data standards, the SMTA International Conference helps attendees minimize risk and raise competitiveness in the electronics manufacturing industry.

To learn more about FactoryLogix®, please visit Aegis and receive a one-on-one demonstration in booth #211.

About Aegis Software

Founded in 1997, Aegis Software uniquely delivers a comprehensive and flexible end-to-end manufacturing execution system (MES) platform giving manufacturers the speed, control, and visibility they require. Aegis has international sales and support offices in Germany, UK, China and Japan, and partners with more than 37 manufacturing equipment suppliers. Since its inception, Aegis has been helping more than 2,000 factories across the military, aerospace, electronics, medical, and automotive industries, drive rapid and continuous innovation with the highest quality while reducing operational costs.
