

Aegis Software to Showcase Latest Manufacturing Execution System Innovations at Two Premier Industry Conferences

Delivering a Truly Transformative, Uniquely Adaptive and Unprecedented Platform for World-Class Manufacturing Companies

HORSHAM, PA (October 4, 2018) [Aegis Software](#), a global provider of [Manufacturing Execution Software \(MES\)](#), will be showcasing the latest release of their industry-leading MES platform, which now includes the most comprehensive Quality Management System available. The new FactoryLogix® platform will be demonstrated at Surface Mount Technology Association's International Conference (SMTAI), in Chicago, October 14th-18th and The 2018 ASSEMBLY Show, in Chicago, October 23rd-25th.

The annual SMTAI Technical Conference and Exhibition brings together a network of professionals who will build skills, share practical experience, and develop solutions in Electronics assembly and emerging Manufacturing technologies. At SMTAI, Michael Ford, Sr. Director of Emerging Industry Strategy at Aegis Software, will present the professional development course *Component Traceability - Reduce the Risk of Counterfeits*, focusing on how to improve product quality, increase reliability, and decrease costs. As part of the show's Technical Innovations Track, Ford will also lead the workshop, *How Do I Get Smart with IPC's CFX*, which will explore how a single "plug and play" data communication standard can solve today's challenges of factory digitalization.

The 2018 ASSEMBLY Show connects manufacturing suppliers, buyers and users of assembly equipment in a unified forum to discuss the latest technological advances in automation, robotics, conveyors, and vision systems. Aegis Software will demonstrate how their [FactoryLogix](#) MES solution automates data-driven insights for optimized shop floor production, reduced costs, and faster time to market. In line with the show's emphasis on Digital Transformation, Aegis Software brings its domain expertise and proven experience in helping customers solve traditional manufacturing challenges with flexible, intuitive, and comprehensive solutions.

FactoryLogix is a holistic and modular platform which delivers leading-edge technology with easily configurable modules to support and execute a discrete manufacturer's strategy towards Industry 4.0. FactoryLogix manages the entire manufacturing lifecycle: from product launch to material logistics, through manufacturing execution, to powerful analytics and real-time dashboards. This end-to-end platform helps companies accelerate product introductions, streamline processes, improve quality and traceability, reduce costs and gain greater visibility for competitive advantage.

Aegis Software experts will be on hand to discuss and demonstrate how companies can leverage the power, connectivity, and adaptability of FactoryLogix to drive quality, control, and visibility for operational excellence. To schedule your one-one demonstration, please click on the corresponding links for each show. SMTAI will take place in Rosemont, IL this October 14th– 18th and [Aegis will be](#)

[exhibiting in Booth #909](#). The ASSEMBLY Show will take place in Rosemont, IL this October 23rd – 25th and [Aegis will be exhibiting at Booth #1345](#).

About Aegis Software

Founded in 1997, Aegis Software uniquely delivers a comprehensive and flexible end-to-end manufacturing execution system (MES) platform giving manufacturers the speed, control, and visibility they require. Aegis has international sales and support offices in Germany, UK, and China, and partners with more than 37 manufacturing equipment suppliers. Since its inception, Aegis has been helping more than 2,000 factories across the military, aerospace, electronics, medical, and automotive industries, drive rapid and continuous innovation with the highest quality while reducing operational costs.
