Cogiscan Partners with Siemens PLM Software to Provide a Complete Industry 4.0 Solution for Electronics Manufacturing

BROMONT, CANADA, October 2016 — Cogiscan Inc., the leading Track, Trace and Control (TTC) solutions provider for the electronics manufacturing industry, is partnering with Siemens PLM Software to provide a complete manufacturing software solution to enable Industry 4.0 for Electronic Manufacturers.

The Cogiscan suite of [TTC solutions](#) includes world-class material control, traceability and TTC analytics to achieve significant improvements in visibility, quality and productivity. Siemens PLM Software is a world-leading provider of [product lifecycle management](#) and [manufacturing operations management](#) software for all industries, including the out-of-the-box SIMATIC IT Unicam eMES solution for electronic manufacturing. Together, Cogiscan and Siemens will help companies realize innovation by optimizing their processes, from planning and development through manufacturing, production and support.

Cogiscan is the industry leader in Track Trace and Control technology, with the largest library of machine interfaces due to their unique partnerships with all major equipment vendors. SIMATIC IT Unicam (the Siemens Manufacturing Execution System for electronics) makes use of this proven technology to provide all of the specific material control functions while collecting complete and accurate data from every machine and process.
