Cogiscan Partners with iBASEt for Automated Electronics Assembly

BROMONT, CANADA, July 2017 — Cogiscan Inc., the leading Track, Trace and Control (TTC) solutions provider for the electronics manufacturing industry, today announced that it has partnered with iBASEt, Inc. to offer an integrated solution that automates data collection and verification processes at the production line for manufacturers of complex electronic assemblies.

iBASEt is a leading provider of software solutions to complex, highly regulated industries, such as aerospace and defense, medical devices, nuclear, industrial equipment, electronics, and shipbuilding. Products built by these high-tech industries have an increasing number of electronics components and manufacturers are increasingly interested to integrate production equipment to the Manufacturing Execution System (MES) for automated control and data collection to save time and minimize errors.

iBASEt and Cogiscan are strategically working together to achieve quicker integrated solutions where manufacturers leverage the combined experience from both vendors in their different area of expertise. Cogiscan provides deep domain expertise with the integration of electronics assembly and inspection equipment and a wide library of machine interfaces to collect real-time production data.

Conrad Leiva, VP Product Strategy and Alliances at iBASEt commented on this announcement: “The vision for Industry 4.0 requires open software solutions that can be easily combined to help manufacturers achieve the goals of a connected real-time manufacturing enterprise. One company

alone is not going to achieve this vision and integrate the myriad of different types of manufacturing equipment for different industries. By partnering with Cogiscan, iBASEt offers its customers more equipment integration options with a proven electronics industry leader.”

“We are very excited to announce this new partnership,” said Dave Trail, Global Manager - Software Partners at Cogiscan. “We look forward to working jointly with iBASEt in providing to their customers a comprehensive integrated solution for automating the assembly line data acquisition process into iBASEt’s SOLUMINA MES from data rich equipment like SMT component placement and inspection machines.”

About iBASEt

iBASEt is a leading provider of software solutions to complex, highly regulated industries, like Aerospace and Defense, Medical Devices, Nuclear, Industrial Equipment, Electronics, and Shipbuilding. iBASEt’s Solumina software streamlines and integrates Manufacturing Execution Systems and Operations Management (MES/MOM), Maintenance, Repair and Overhaul (MRO) and Enterprise Quality Management Systems (EQMS) for operations and Supplier Quality Management. Solumina is implemented by many industry leaders in the Aerospace and Defense sector, including agencies of the U.S. Government. For more information, visit www.iBASEt.com.

About Cogiscan Inc.

Cogiscan is the leading track, trace and control (TTC) solutions provider for the electronics manufacturing industry. The scalable Cogiscan platform perfectly integrates with all major equipment types, and is highly configurable to enable a personalized solution to each customer’s specific production needs. Since 1999 Cogiscan has attained several international patents for TTC hardware and software, and has won multiple awards throughout the years. For more information, visit www.cogiscan.com.
