Farid Anani Returns to Computrol as VP of Operations

MERIDIAN, IDAHO — May 2017 — Computrol, Inc., a world-class provider of mid- to low-volume, high-mix electronic manufacturing services to OEMs, today announced that Farid Anani has rejoined the company as its Vice President of Operations. Anani previously lead Computrol's engineering and production groups for more than 10 years. After leaving the company to explore other career opportunities, he has returned in an increased capacity.

Anani has held several positions in the CEM business throughout the past 25 years. His career started with Tandy Electronics Manufacturing Division in Salt Lake City, UT as a process engineer, then he was promoted to engineering manager and finally he went on to become the operations manager. He became Circuit Technology's vice president of manufacturing in 1993 and joined Computrol in 2000 as the manufacturing manager.

With his ability to solve technical problems and lead multi-disciplinary teams, Anani has championed several projects at Computrol, including Valor's implementation, which resulted in quality enhancement and increased reliability and profitability, further earning him the trust and respect of both colleagues and clients.

Anani graduated from the South Dakota School of Mines and Technology with a Master's of Science in Electrical Engineering in 1989 and from Boise State University with an MBA in 2006.

Computrol's electronics contract manufacturing expertise allows customers to realize significant improvements in cycle time, asset utilization, reliability, flexibility, and responsiveness. These objectives are achieved through integration of modern systems and processes, highly skilled and experienced people, fact-based process management, and continuous improvement.
