Computrol Receives a Global Technology Award for Its Updated Manufacturing Services

MERIDIAN, IDAHO — September 2016 — Computrol, Inc. announces that it was awarded a 2016 Global Technology Award in the category of Contract Services \$50-100 million for its Manufacturing Services. The award was presented to the company during a Tuesday, September 27, 2016 ceremony that took place at the Donald Stephens Convention Center in Rosemont, IL during SMTA International.

Over the past year, Computrol has upgraded its two state-of-the-art facilities with more than ten new advanced systems to keep up with its customers' needs. Some of Computrol's new capabilities include the Spea 4050 Flying Probe, a Nordson DAGE Ruby FP X-ray system, two MV-7 OMNI 3D In-Line AOI Machines from MIRTEC at each facility, three KY-8030-3 in-line, fully automated SPI systems from Koh Young Technology, and more.

Computrol's electronics contract manufacturing expertise allows customers to realize significant improvements in cycle time, asset utilization, reliability, flexibility, and responsiveness. These objectives are achieved through integration of modern systems and processes, highly skilled and experienced people, fact-based process management, and continuous improvement.

Computrol is certified to ISO 9001-2008, ISO 13485 specific to medical device quality systems, AS9100 specific to military and aerospace quality systems, IPC class II and III and J-Std certified as well as being ITAR registered and lead-free RoHS compliant. For more information, visit www.computrol.com.

Premiering in 2005, the Global Technology Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts.
