Computrol Accepts Its 7th Global Technology Award

MERIDIAN, IDAHO — November 2019 — Computrol, Inc., a world-class provider of mid- to low-volume, high-mix electronic manufacturing services to OEMs, announces that it was awarded a 2019 Global Technology Award in the category of Contract services \$50-100 million. The award was presented to the company during a Tuesday, Nov. 12, 2019 ceremony that took place during productronica in Munich, Germany. This is the seventh time that Computrol has been selected for this award.

Founded in 1984, Computrol has a long history of providing electronics contract manufacturing services and support to blue-chip customers ranging from military and medical electronics, to telecommunications and computer peripherals.

Under the direction of Charles Scott, president & CEO, Computrol's electronics manufacturing services (EMS) business has increased to include seven surface mount technology (SMT) lines in two factories and sales revenues have increased 2500 percent.

The company focuses on providing electronics manufacturing services throughout the lifecycle of high-mix products. Maintaining this focus enables Computrol to provide faster assembly operations than those in large factories.

Core to its business, Computrol continues to focus on prototyping and low to medium volume, high mix production of PCB, box build, cable harness and backplane assemblies. Computrol maintains its ISO 9001-2008 certification, ISO 13485 specific to medical device quality systems, AS9100 specific to military and aerospace quality systems, IPC class II and III and J-Std certified as well as being ITAR registered and lead-free RoHS compliant.

Premiering in 2005, the Global Technology Awards program is an annual celebration of product excellence in electronics surface mount assembly. Premier products based on the finest examples of creative advancement in technology are chosen by a distinguished panel of industry experts.
