Conesus Launches New Web Site; a 'Green' Knowledge Resource for Metals Recycling

Terrell, Texas, USA -- Conesus, LLC, an innovative environmental technology and recycling company, announces the launch of its new web site at www.conesusllc.com, a comprehensive resource for SMT electronics manufacturers and a wide range of other manufacturing industries who produce tin and other metals wastes.

Conesusllc.com provides a fresh look at the simplicity, and profitability, of trading metals waste for cash using Conesus' recycling programs. Conesus, LLC is a sophisticated 'green' recycler and refiner of SMT solder/solder paste wastes and residues, as well as Tin, Lead, Silver, Gold, and Copper from a variety of

manufacturing industries. Conesus converts these wastes into usable metal products. Conesus' raw materials come from a variety of manufacturing industries in North America and Europe, and our products are shipped worldwide.

In making the announcement, Steve Butler, Commercial Director, stated, "We've 'recycled' our web site, so to speak, and have re-launched it as an expanded, updated web resource that's easier to navigate and contains more vital information and solutions for our customers who want to run a 'greener' operation and, remarkably, be paid back for doing so. Being 'green' doesn't get any better than that."

"Now, our customers can learn how Conesus' recycling technology benefits the SMT/PCB electronics manufacturer, how the system works, and how it represents a new way of dealing with metals-

contaminated waste in an increasingly environmentally-conscious manufacturing world. Here are the clear answers that they are looking for.”

With patented, advanced recycling technologies, Conesus keeps its customers compliant with local, state, and federal regulations while decreasing their carbon footprint and reportable waste streams. For more information, visit www.conesusllc.com.

About Conesus

Founded in 1980, Conesus, LLC is a sophisticated ‘green’ recycler and refiner of SMT solder/solder paste wastes and residues, as well as Tin, Tin-Zinc, Lead, Silver, Gold, and Copper from a variety of manufacturing industries. Located in Terrell, Texas, USA, Conesus converts these wastes into usable metal products. Conesus’ mission is to provide innovative and high-quality industrial byproducts management, metal recovery, and recycling options that provide world-class value and service to our customers, and display respect and stewardship toward the environment. For more information, visit www.conesusllc.com.
