INTERFLUX® Electronics Completes Testing on New Alloy at Erska Demo Room

Plymouth, WI — September 2017 — Kurtz Erska North America, a leading supplier of electronics production equipment, is pleased to announce that it recently completed tests with [INTERFLUX® Electronics](#) on a new solder alloy. The tests were run on INTERFLUX's LMPA™-Q alloy on the VERSAFLOW selective solder machine. The company offers a full range of tests at its demo room in Plymouth.

Erska ran tests on INTERFLUX's new cost-saving, high-speed, low melting point soldering alloy for wave and selective soldering. The new LMPA™-Q alloy also is available as a solder paste for reflow soldering. The alloy can be used with existing older equipment as well as with latest state-of-the-art high-end soldering machines.

Albrecht Beck, President of Kurtz Erska NA commented, "The alloy has undergone extensive testing on our equipment, and has passed all tests. Erska is proud to be the point of contact in the U.S. for INTERFLUX. Additionally, Erska Germany is the official distributor for INTERFLUX in Germany. We are excited to announce that we can run two different alloys in our Powerflow S wave machines and any of our selective systems that are arranged with two pots with no change-over time."

Albrecht Beck, President of Kurtz Erska NA, Joe Clure, Process Engineer at Kurtz Erska, and Steven Teliszewski, Technical Director at INTERFLUX

Around the world, Erska's customers and business partners have access to spacious demonstration, application and training centers outfitted with the most modern equipment. There are seven Erska Service Centers of this kind in total, all of them boasting the complete soldering systems product portfolio, as well as the Erska "Tools, Rework and Inspection" business line. In all Erska Service Centers, the company's experienced application engineers are ready to demonstrate the Erska hardware and test it for specific purposes.
