Ersa Address All Users with the Highest Precision & Safety Rework Requirements at SMTA Empire Expo

Plymouth, WI — May 2017 — Kurtz Ersa North America, a leading supplier of electronics production equipment, is pleased to announce that it will exhibit at the SMTA Empire Expo & Tech Forum, Thursday, June 15, 2017 at the Holiday Inn Syracuse/Liverpool in Liverpool, NY. Ersa's team will discuss the award-winning HR 550 hybrid rework system and Smartflow 2020 selective solder system.

The HR 550 hybrid rework system features a 1,500W high performance hybrid heating element to desolder and solder SMT components up to 70 x 70 mm. A 2,400 W infrared bottom heater in three heating zones guarantees homogeneous bottom-side preheating of the complete assembly. The system addresses all users with the highest requirements in terms of precision and process safety in electronic assembly rework applications.

The Smartflow 2020 selective soldering system requires less than 3 m² of space, thus fitting optimally into cell production environments. Due to its universal pallet fastening, the Smartflow can handle PCB sizes of up to 508 x 508 mm [20" x 20"]. With the Smartflow 2020, Ersa finally closes the gap from its high-end Versaflow platform to an entry level machine.
