

Press release

Discover Ersa's Advanced Reflow, Selective Solder and Rework Systems at the SMTA New England Expo

Plymouth, WI — November 2017 — Kurtz Ersa North America, a leading supplier of electronics production equipment, will exhibit at the SMTA New England Expo & Tech Forum, scheduled to take place Thursday, Nov. 16, 2017 at the DCU Center in Worcester, Ma. The Ersa team will highlight its advanced reflow, selective solder and rework equipment.

The Ersa Hotflow 3/20 offers ten top and bottom heated zones and four active cooling zones. The system presents a process efficient solution, which is characterized by its high throughput inline operation, low operating cost and very attractive price.

Ersa offers a range of selective solder systems, starting with the Smartflow 2020. Due to its universal pallet fastening, the Smartflow can handle PCB sizes of up to 508 x 508 mm [20" x 20"]. The Smartflow 2020 is smart and compact without compromising quality.

The HR 550 hybrid rework system features a 1,500W high performance hybrid heating element to desolder and solder SMT components up to 70 x 70 mm. A 2,400 W infrared bottom heater in three heating zones guarantees homogeneous bottom-side preheating of the complete assembly. The system addresses all users with the highest requirements in terms of precision and process safety in electronic assembly rework applications.
