## Fisnar launches Europe's Smallest Precision Tapered Dispense Tip

Fisnar Europe is pleased to announce the launch of two newly developed innovative Precision Tapered Dispense Tips, ideal for use in medical devices and industrial electronics manufacture.

The first of these new dispense tips is a standard 27 gauge, while the second is a 30 gauge tip with an internal diameter of just 0.15mm. The 30 gauge tip is the first polymer taper dispense tip of this size to be available in the European market place, and is exclusive to Fisnar Europe.

Robert Campbell, Fisnar Europe Product Line Manager, comments "I am delighted that Fisnar is at the forefront of developing new dispense products to meet the needs of the market today and into the future. We are confident that customers will be impressed with our latest innovation, the 30 gauge taper dispense tip."

The concept behind the development of Fisnar's new 30 gauge tip is simple. After conducting research, Fisnar Europe uncovered a critical problem in the dispensing market. In this modern marketplace, products are increasingly becoming smaller and smaller, thus creating a need for small deposit sizes.

Due to this trend, the use of smaller sized needles is on the rise, however the issue users are experiencing is that conventional similar sized straight blunt-end tips generate high levels of fluid back pressure, creating an extended dispense time and the risk of inconsistent dispensing volumes due to fluid drooling.

The new luer lock tapered dispense tips from Fisnar were designed to address this issue and have proven to reduce dispensing time, fluid drooling and back pressure. Furthermore, the new tips enable more consistent dispense results by allowing the user to apply and dispense in smaller volume and deposit sizes which is especially useful when dispensing high viscosity materials in small shots.

The new Fisnar precision [tapered dispense tips](#) are available to order now. Please contact [infoeurope@fisnar.com](mailto:infoeurope@fisnar.com)

## **About Fisnar Europe**

Fisnar Europe is a leading manufacturer and supplier of precision fluid dispensing and fluid handling solutions.

With over 50 years' knowledge of the dispense industry and its regional requirements, we have an accomplished range of dispensing products including dispensing [robots](#), dispensing [valves](#), fluid [dispensers](#) and a complete selection dispensing [consumables](#).

Armed with technical expertise and a diverse portfolio of dispensing products, Fisnar Europe can supply a dispensing system to suit every budget, application, and industry.

Fisnar Europe products are available to purchase via our trusted network of European distributors. We will connect you with an experienced Fisnar distributor in your local area who will work with you to understand your specific application requirements, before offering advice and guidance on the Fisnar dispensing system best suited to your needs.
