FOR IMMEDIATE RELEASE

British Manufacturer & Distributor Gen3 Systems Launches Revamped Website

FARNBOROUGH, UK — October 2016 — Gen3 Systems Limited, a specialist British manufacturer and distributor, has launched its new website: www.gen3systems.com. The new site has been given a complete makeover and updated with the latest information about Gen3 and its products.

Gen3 is a multi-faceted organization, and the new site includes further details on each of its different capabilities. The company has a long-standing reputation for manufacturing and distributing test and measurement equipment, and more recently for its growing test service capabilities. As a diversified engineering services company, Gen3 provides a range of product testing, inspection, certification and supply chain management solutions.

The company specializes in the manufacture of conformal coating equipment, ionic contamination systems, solderability, SIR & CAF, and electronic circuit cleaning equipment. Also serving as a consultant, Gen3's industry-leading experts are able to offer full customer training and consultancy services in all specialist areas.

The new website also includes details on the company's free TechShot™ service. The company prides itself on the quality of its technical support to customers. Additionally, Gen3 believes that the most effective communication tool is to offer a comprehensive range of support information.

Gen3's revamped website features a 'News' page that is continually updated with the latest company news, a 'Contact' page with a map of its worldwide distributors, is mobile compatible and extremely easy to navigate.

For more information about Gen3 Systems, visit www.gen3systems.com.

About Gen3 Systems

Gen3 Systems Limited is a specialist British manufacturer and distributor of test and measurement equipment used to predict reliability and maintain quality in the production of electronic circuits. We are a small team of experts offering not only equipment and test services but also full customer training and consultancy services in specialist areas.

Gen3 Systems works closely with the world-renowned UK National Physical Laboratory (NPL) that helps with the development of new measurement techniques and equipment. We are engaged in international standards development through the BSi, IEC and IPC. Our combined knowledge and experience is also employed to provide training and advice to customers, along with a range of comprehensive in-house services for solderability, SIR and cleanliness testing.
