Inovaxe Is Making Storage SMARTER – Visit Booth #915 at SMTAI

DEERFIELD BEACH, FL — August 2017 — Inovaxe is pleased to announce plans to exhibit at SMTA International, scheduled to take place Sept. 19-20, 2017 at the Donald Stephens Convention Center in Rosemont, IL. The Inovaxe team will showcase the Smart Rack series SR700 & SR130, along with its SMART InoAuto Storage Systems in Booth #915.

The SR series Smart Rack is intended for customers whose main challenge is finding parts quickly and do not need all of the features of the InoAuto Smart carts. The design is based on Inovaxe's cost-effective InoKit platform. The Smart Rack controller unit includes Inovaxe's InoAuto Locator software to quickly locate, add, return and transfer parts. The SR series trays are available to store 7" and 13" reels of various widths, as well as mechanical bins.

Additionally, Inovaxe is excited to showcase its SMART InoAuto Storage Systems. The InoAuto Two Bay stores 1,120 7" SMT reels and the InoAuto Single Bay stores 560 7" SMT reels. All of the SMART systems are equipped with sensors and LED indicator lights, along with the InoAuto Locator software, and respond as if the reels have RFID on them. The operator will simply barcode scan the part number and quantity on a reel and place it into an empty Single Package Single Location slot. The InoAuto will report the position of the part to its database automatically.

The SMART InoAuto ultra-lean material handling systems enable users to locate parts in less than four seconds and return a part in less than eight seconds. The carts are mobile, store 560 reels in 0.23 m² or store 1120 reels in 0.42 m², and the ROI is less than six months. Inovaxe has provided manufacturers with the capabilities to substantially streamline their material handling systems and achieve the following benefits:

- More than 90 percent labor reduction in pulling kits and returning parts
- More than 90 percent space reduction for storing SMT parts and kits
- Reduction of set up time and increase in machine up time

- Reduction of operator travel time by 60 percent
- Eliminates paper for kit pull and feeder loading operation
- Drastically enhance inventory accuracy without counting parts
- Substantially reduce errors in the feeder set up operation
- Typical ROI is less than three to six months

Inovaxe offers linkage to Panasonic's SMT line PanaCIM 10 software. For more information about how Inovaxe's innovative material handling systems and services can improve your inventory accuracy, reduce storage space and reduce your labor costs, visit www.inovaxe.com.
