**RelianceCM Installs New Juki Line**

**MORRISVILLE, NC — August 2020 —** Juki Automation Systems (JAS), Inc., a world-leading provider of automated assembly products and systems and subsidiary of Juki Corporation, is pleased to announce RelianceCM has installed a new Juki line at its contract manufacturing lab in Corvallis, OR. The sale was liaised by Mike Gunderson of MaRC Technologies. RelianceCM has more than 25 years of experience specializing in contract manufacturing for startups, emerging businesses and pioneering OEMs.

The new line includes two RS-1 Placement Machines and a G-Titan Automated Screen Printer. RelianceCM has made aggressive capital investments in order to add state-of-the-art PCB manufacturing equipment. The new Juki line is a key part of the company’s growth strategy. David Schroeder, President of RelianceCM commented: “We have been running Juki equipment for the past 10 years and have had nothing but good experiences. The support and training we receive from them is great, and the machines have been incredibly reliable. With the addition of the RS-1s to our current setup, this allows us to offer not only competitive volume production, but also a quick-turn prototype line.”

The RS-1 features the Takumi head, a dynamic height, 8 nozzle placement head that automatically adjusts pick-and-placement height on-the-fly to optimize speed while offering a high degree of flexibility. With the new PG-01 offline teach camera and line optimization JaNets/NPI Plus software, the RS-1 provides easy data entry for faster programming.

The new G-Titan screen printer is equipped with industry-leading “standard” features that empower customers with the highest quality printing solution, a path to Industry 4.0, and

“Lights-Out-Manufacturing” with its award-winning specifications. The printer features a new interface with a modern look and many standard features, including touchscreen LCD, stencil inspection, solder paste rolling measurement, stencil lock, support block crash prevention and automatic solder paste dispense (500g jar).

Rather than focus on a particular industry or product type, RelianceCM was built for the early stages of the product life cycle – The start-up, production and launch phase. The company provides complete engineering, manufacturing and fulfillment solutions tailored to the demands of your industry. **About Juki Automation Systems, Inc.**

Juki Automation Systems (JAS), is an international leader in high-speed SMT Assembly equipment, has shipped more than 40,000 machines worldwide since 1987. Juki has built its global image with a combination of top-quality and high-reliability machines with a reputation for world-class service and support that result in the lowest production costs for its customers. Juki machines have about 30 percent U.S. made content by cost. The pioneer of the modular assembly system in 1993, Juki offers flexible solutions designed for both high-volume and high mix environments. JAS, Inc. employs 45 U.S. employees, including 20 service personnel five specializing in applications sales.

Additionally, JAS, Inc. offers a full line of SMT manufacturing products as well as selective solder and stamp soldering machines plus Advanced Technology through-hole machines. Juki supports one of the largest field service groups in the industry. For more information, visit [www.jukiamericas.com](http://www.jukiamericas.com).
