FOR IMMEDIATE RELEASE

Libra Industries Offers Complete AOI Traceability

MENTOR, OH — April 2018 — Libra Industries, a privately held electronics manufacturing services (EMS) provider, is pleased to announce that it has expanded its factory-wide Cogiscan Track, Trace & Control (TTC) Software to cover its AOI operation on multiple lines. A long-time Cogiscan customer, this system expansion demonstrates Libra Industries' commitment to customer service.

Libra Industries now has complete traceability of its AOI operations with connectivity to its MIRTEC and Omron AOI systems. For AOI operations, the software will report defects and prevent failed products from moving downstream. This means traceability of rework and repair operations, as well as enhanced quality assurance and richer traceability history for Libra Industries' customers.

"The expansion of the Cogiscan software eliminates manual entry of data collection," commented Steve Schwaebler, Vice President of Operations, Libra Industries. "The software will lead us further into a Smart Factory and Industry 4.0 solution."

The scalable, modular Cogiscan platform perfectly integrates with all major equipment types, and is highly configurable to enable a personalized solution for each customer's specific production needs. "We are pleased to support the seamless integration of these AOI systems within Libra's factory-wide TTC system," states Mitch DeCaire, Global Director, Equipment Partnerships. "Cogiscan is proud of our long-standing relationship with Libra Industries."

Cogiscan is the leading track, trace and control (TTC) solutions provider for the electronics manufacturing industry. Since 1999 Cogiscan has attained several international patents for TTC hardware and software, and has won multiple awards throughout the years. For more information, visit www.cogiscan.com.

Libra Industries continues to invest to provide customized manufacturing solutions to help make its customers more competitive and improve their profitability. Find out more at www.libraind.com.

About Libra Industries

Libra Industries is a leading provider of integrated Electronic Manufacturing Services (EMS), serving OEMs with complex or technologically sophisticated manufacturing requirements in a broad range of industries including industrial automation, medical, military and aerospace, instrumentation and LED lighting. Four world-class manufacturing facilities allow Libra Industries to provide customers with manufacturing flexibility including complete system build, module and subassembly production, as well as simple to complex PC board assembly. With an ongoing commitment to investment in people, quality systems, and the latest manufacturing equipment and processes, Libra Industries is committed to managing their clients' products from initial design and prototype to full production; assisting their clients in their efforts to improve time to market, reduce total systems cost, and increase quality.
