Libra Industries Adds Robotic Conformal Coating Capability

MENTOR, OH — January 2019 — Libra Industries, a privately held electronics manufacturing services (EMS) provider, is pleased to announce that it purchased a Delta 6 robotic conformal coating/dispensing system from PVA. The system was installed at Libra's Mentor facility last month.

Matt Tringhese, Libra Industries' Director of Manufacturing, stated, "The addition of the PVA Delta 6 machine is exciting for us, as it supports our strategy for continual improvement to ensure that we always have the capabilities to meet the quality and throughput expectations our customers expect."

The Delta 6 is ideal for selective coating, potting, bead, and meter-mix dispensing applications. It features a robust overhead three-axis motion platform suitable for inline or batch operations. While maintaining the preferred features of previous workcells, the Delta 6 has been designed with a slimmer footprint, improved structural and gantry rigidity for robustness, and easier access.

The Delta 6 has many integrated features including:

- PathMaster® Windows- based software
- FastPath™ offline image programming capability
- Onboard PC with flat screen monitor
- Remote teach pendant with trackball
- USB communication port
- Closed-loop low level exhaust notification (spray systems)

Adrienne Page, Component Engineer

Libra Industries continues to invest to provide customized manufacturing solutions to help make its customers more competitive and improve their profitability. For more information about Libra Industries, visit www.libraind.com.

About Libra Industries

Libra Industries is a leading provider of integrated Electronic Manufacturing Services (EMS), serving OEMs with complex or technologically sophisticated manufacturing requirements in a broad range of industries including industrial automation, medical, military and aerospace, instrumentation and LED lighting. Four world-class manufacturing facilities allow Libra Industries to provide customers with manufacturing flexibility including complete system build, module and subassembly production, as well as simple to complex PC board assembly. With an ongoing commitment to investment in people, quality systems, and the latest manufacturing equipment and processes, Libra Industries is committed to managing their clients' products from initial design and prototype to full production; assisting their clients in their efforts to improve time to market, reduce total systems cost, and increase quality.
