NEO Tech Enters into Successful Partnership with Cephasonics

CHATSWORTH, CA – August 30, 2016 – NEO Tech, a leading provider of manufacturing technology and supply chain solutions for brand name OEMs in the industrial, medical and mil/aero markets, announces that it has entered into a new engineering and manufacturing partnership with Cephasonics, an innovator and technology leader in ultrasound products.

As part of the relationship, NEO Tech provides the support Cephasonics needs to grow its business faster by providing access to scale, helping the company accelerate its value proposition. To accomplish this, NEO Tech delivers local, US-based DFM and engineering services to make Cephasonics' advanced technology products more manufacturable. NEO Tech's solution will result in a strong, consistent connection between Cephasonics and the production environment that is needed to produce the state-of-the-art ultrasound products. NEO Tech's concurrent engineering services are a critical enabler that enhances Cephasonics own engineering capabilities as an emerging leader in the medical- and industrial-device industry.

NEO Tech provides DFM and test engineering services, vastly improving the testability of designs early in the development cycle – before the manufacturing process has started. Other services include printed circuit card assembly, cables and harnesses manufacturing, and box build. As part of the partnership, NEO Tech will build Cephasonics' cQuest Cicada™ product platform, which is a scalable, full-featured ultrasound platform that offers a high level of flexibility and excellent image quality, enabling fast time to market for the customers' end products. The partnership allows NEO Tech to help Cephasonics best use its ultrasound technology to create game-changing ultrasound-based products.

“NEO Tech's engineering team has delivered a concurrent engineering solution that helps us get our products to market faster, and enables our ability to scale the business,” said Cephasonics' Vice President of Operations, Mike Lloyd.

David Brakenwagen, NEO Tech's Chief Sales and Marketing Officer, added, “We are pleased and honored to engage in this business partnership with Cephasonics. We anticipate a long-term relationship that grows and strengthens over time to consistently provide mutual benefit and success.”

*We make amazing things happen.**

About NEO Tech

NEO Tech combines the strengths of three leading contract manufacturers: NATEL, EPIC, and OnCore. With over 40 years of heritage in electronics manufacturing, NEO Tech focuses on low-medium-volume/high-mix, high-complexity products primarily in the medical, defense/aerospace and industrial markets.

NEO Tech is favorably positioned among mid-tier EMS manufacturers to “make amazing things happen.” NEO Tech offers full product lifecycle engineering services, manufacturing and testing of microelectronics, cable & harness interconnect products, PCBA, full box build services and aftermarket repair and fulfillment services. The companies that form NEO Tech have been known for solving tough engineering problems that result in high-reliability, high-quality electronic solutions for customers.

Headquartered in Chatsworth, CA, NEO Tech has manufacturing and engineering locations in California, Colorado, Illinois, Massachusetts, Nevada, Ohio, Tennessee, Mexico, and China. NEO Tech holds and maintains industry specific certifications that include ISO9001, AS9100, ISO13485, ISO/TS16949, ISO14001 and MIL-PRF-38534. To learn more, visit www.NEOTech.com.
