## **Nordson SELECT Appoints MaRC Technologies as Pacific Northwest Sales Rep for Entire Selective Soldering Product Line**

- **MaRC Technologies has over 25 years of experience representing manufacturers throughout Washington, Oregon and Montana**

**Liberty Lake, WA, USA – 28 May 2020** – Nordson SELECT, a Nordson company (NASDAQ: NDSN), is pleased to announce that MaRC Technologies has been appointed as sales representative for the entire SELECT product line in Washington, Oregon, and Montana.

The Americas Sales and Service Manager for Nordson SELECT, Kevin Valentine, stated, “this partnership will continue to provide us with the growth we have enjoyed in the past in the Northwest region.” MaRC Technologies Inc. currently represents other Nordson brands including Nordson ASYMTEK, Nordson DAGE, Nordson MATRIX and Nordson YESTECH.

MaRC Technologies Inc. was founded in 1995 and has a stated goal of being the best manufacturing representative group in the Pacific Northwest. They provide a wide variety of electronics solutions with equipment functionality varying from soldering and inspection to assembly and dispensing. MaRC Technologies Inc. President, Mike Gunderson commented that “we are excited and honored to add Nordson SELECT to the Nordson family of product lines that we current represent.” Gunderson also stated that Nordson SELECT will meet customer needs in the everchanging soldering industry by providing “quality products, exceptional service, and continued innovation.”

### **About Nordson SELECT**

Nordson SELECT, is a leading worldwide supplier of selective soldering systems including Novo® standalone machines offering exceptional value and superior process capability ideal for batch production, Cerno® in-line systems delivering uncompromised quality and productivity for demanding soldering applications, and Integra® multi-station modular systems designed to meet the most challenging high-volume requirements by combining parallel processing with multiple soldering nozzles for the ultimate in flexibility and maximum throughput.
