Nordson SELECT to Exhibit Award Winning Selective Soldering Technology at SMT Nuremberg 2018 Exhibition

Several Nordson SELECT selective soldering products have been honored with prestigious awards for innovation and excellence

Liberty Lake, WA, USA – 22 May 2018 – Nordson SELECT, a Nordson company (NASDAQ: [NDSN](#)), will exhibit its award-winning technologies together with smartTec GmbH in Hall 4, Booth 101 at the upcoming SMT Nuremberg 2018 exhibition scheduled to take place June 5-7, 2018 at the Nuremberg Messe in Nuremberg, Germany.

These esteemed awards include an NPI Award, SMT China VISION Award, and an EM Asia Innovation Award. The Circuits Assembly New Product Introduction (NPI) Award recognizes the leading new products for electronic assembly during the past 12 months and is selected by an independent panel of practicing industry engineers.

The SMT China VISION Awards recognize excellence in the surface mount industry within China's electronics manufacturing sector. The EM Asia Innovation Awards recognize excellence and leadership through innovation within the Asian electronics industry, inspiring companies to achieve the highest standards and push the industry forward.

On exhibit will be an Integra™ 508.2 selective soldering system equipped with advanced process controls. The Integra™ 508.2 is a versatile selective soldering platform and can be equipped for either single, parallel or double processing. When configured with dual drop-jet fluxers and dual solder pots, the Integra™ 508.2 can solder two printed circuit boards at the same time.

Also on display will be Nordson SELECT's unique automatic solder nozzle tinning system. Unlike other nozzle cleaning systems, Nordson SELECT's patent pending system does not spray an adipic acid, or a liquid or powdered flux. This exceptional solder nozzle tinning system keeps the solder nozzles pristinely clean by automatically removing oxidation residues and re-tinning the surface of the solder nozzles without any resulting overspray or contamination of the printed circuit board or the selective soldering machine.

For information contact Nordson SELECT at sales.usa@nordsonselect.com, call +1.509.924.4898, or visit our website www.nordsonselect.com.

About Nordson SELECT

[Nordson SELECT](#), is a leading worldwide supplier of selective soldering systems including Novo™ standalone machines offering exceptional value and superior process capability ideal for batch production, Cerno™ in-line systems delivering uncompromised quality and productivity for demanding soldering applications, and Integra™ multi-station modular systems designed to meet the most challenging high-volume requirements by combining parallel processing with multiple soldering nozzles for the ultimate in flexibility and maximum throughput. To find out more, visit www.nordsonSELECT.com, or on social media.

About Nordson Corporation

Nordson Corporation engineers, manufactures and markets differentiated products and systems used to dispense, apply and control adhesives, coatings, polymers, sealants, biomaterials, and other fluids, to test and inspect for quality, and to treat and cure surfaces. These products are supported by application expertise and direct global sales and service. Nordson serves a wide variety of consumer non-durable, durable and technology end markets including packaging, nonwovens, electronics, medical, appliances, energy, transportation, construction, and general product assembly and finishing. Founded in 1954 and headquartered in Westlake, Ohio, the company has operations and support offices in nearly 40 countries. Visit Nordson on the web at <http://www.nordson.com>, [@Nordson_Corp](#), or www.facebook.com/nordson.
