Rehm has established itself successfully in the Russian market

Showcasing Protecto at the ElectrontechEXPO 2017

Following Rehm Thermal Systems' successful debut as an exhibitor at last year's ElectrontechEXPO, the German engineering company will again present the latest equipment for efficient electronics manufacturing at the prestigious trade fair in Moscow in 2017. From 25th to 27th April, Rehm will be exhibiting at booth B419, with

a focus on highly selective, innovative coating technologies and optimum protection of sensitive electronic assemblies.

Model of Protecto

Rehm Thermal Systems will be presenting Protecto, its highly selective conformal coating system at ElectrontechEXPO in Moscow.

The use of protective lacquers can significantly improve the quality and durability of electronic products. Protecto protects sensitive assemblies from damage caused by corrosion or other aggressive environmental influences, such as moisture, chemicals, dust or vibration. The coating system allows even complex application processes to be completed in a single process step. With up to four nozzles available, the coating options are extremely flexible. Protecto is also impressive as a production line concept, consisting of a dispenser and drying system.

Rehm will also introduce the newly-developed VarioFlex curtain nozzle at the trade show which has been specifically designed to meet the requirements of high-speed and precision applications.

Visit us on Stand B419. Our trade fair team is looking forward to productive discussions with you.

About Rehm Thermal System

As a specialist in the field of thermal system solutions for the electronics and photovoltaics industries, Rehm is a technology and innovation leader in the modern and economical production of electronic modules. As a globally operating manufacturer of reflow soldering systems with convection, condensation or vacuum, drying and coating systems, functional test systems, equipment for the metallization of solar cells as well as numerous customer-specific special systems, we are represented in all relevant growth markets and, as a partner with more than 25 years of industry experience, we implement innovative manufacturing solutions that set standards.
