

THERMAL SYSTEMS

Press release

16/04/2019

“Look further, go beyond”

Rehm at SMTconnect this May

One of the biggest and most important trade fairs for the electronics industry is coming up: In three weeks, SMTconnect (formerly SMT Hybrid Packaging) will open its doors in Nuremberg from 7-9 May. Rehm Thermal Systems will be attending again this year, too: Come visit the Rehm team in Hall 4A, Stand 100. We'll be delighted to see you!

With their continued developments and optimisations in system and process technology, the developers and designers at Rehm have a vision for the development of electronics production. This is also reflected in the systems and tools that we will be exhibiting: With Rehm Thermal Systems, you can draw on a universe of possibilities while covering the ideal processes for your requirements and those of your customers – all in combination with leading-edge production equipment.

With “Look further, go beyond” serving as our motto for this year’s trade fair, Rehm is showing that the exciting journey in electronics manufacturing is far from over. To wit: Augmented reality, AI in mechanical engineering, Black Factory concepts – what was considered a fictitious scenario not so long ago is now already a reality or on its way to becoming one. At SMTconnect, you will have the opportunity to see for yourself.

We look forward to speaking with you! Visit us in Hall 4A, Stand 100.

You will find more **information** about Rehm’s participation at SMTconnect on our website: <https://www.rehm-group.com/en/media/news/detail/article/look-further-go-beyond-rehm-exhibits-at-smtconnect-in-nuremberg.html>.

THERMAL SYSTEMS

About Rehm Thermal Systems

Rehm is a technology and innovation leader in the state-of-the-art, cost-effective manufacturing of electronic assembly groups and specialises in thermal system solutions for the electronics and photovoltaics industry. Rehm is a globally active manufacturer of reflow soldering systems using convection, condensation or vacuum, drying and coating systems, functional test systems, equipment for the metallisation of solar cells and numerous customised systems. We have a presence in all key growth markets and, as a partner with almost 30 years of industry experience, we are able to implement innovative production solutions that set new standards.
