

## Aegis' FactoryLogix Brings Smart Factory Benefits for Qualitel Corporation

**Horsham, PA, May 2017,** Aegis Software announced today that Qualitel Corporation will be deploying Aegis' FactoryLogix Manufacturing Execution Software (MES) this year at their Everett WA facility. The MES system will be used to provide full traceability and online work instructions for Qualitel New Product Introduction (NPI), CCA Production, and Box-Building departments.

As an Electronics contract manufacturer for customers in the Aerospace, Medical, Industrial, and Military markets, Qualitel is committed to leading the industry with the latest in smart factory innovations. Deploying FactoryLogix across their NPI, CCA Production, and Box-Build departments will allow Qualitel to provide next-level traceability. These features include a complete history of materials consumed, processes and equipment utilized, parametric and quality data collected, rework, dates and times, and electronic signatures.

FactoryLogix™

“Our customers look for a manufacturing partner that is an extension of their business, so it’s important that we offer a process that’s forward thinking and committed to superior quality,” said Paul Weyn, Director of Business Development at Qualitel. “Deploying FactoryLogix at our FDA- and ITAR-registered facility will ensure that our customers benefit from the most cutting-edge advancements in manufacturing technology and traceability.”

### About Aegis

Founded in 1997, Aegis Software is headquartered in a state-of-the-art development and training facility in Philadelphia PA. Aegis has international sales and support offices in Germany, UK, China and Japan, and is partnered with 37 manufacturing equipment suppliers. With a global customer base of over 1700 factories across the military, aerospace, electronics, medical, and automotive industries, Aegis delivers a unique level of capability, value, and time-to-value for its manufacturing customers.

### About Qualitel Corporation

Qualitel is a contract manufacturer of mission-critical electronics, specializing in a full range of high-mix, high-reliability products and services. Qualitel manufactures PCB assemblies and box-build electronics with complex Surface Mount Technology (SMT), Ball Grid Array, and Fine Pitch Technology for the aerospace, medical, industrial, and military markets. Qualitel's unique services include X-Ray, parylene conformal coating, flying probe testing and Hass environmental testing, and are all done internally.
