**FOR IMMEDIATE RELEASE****Specialty Coating Systems Announces New Dates for Educational Parylene Seminars in Malaysia and Singapore**

May 10, 2018 (Indianapolis, IN) – Specialty Coating Systems today announced a date change for its upcoming free, educational Parylene conformal coating seminars. The Singapore seminar will now be held on Thursday, July 19, 2018, and the seminar in Penang, Malaysia will take place Tuesday, July 24, 2018.

Ultra-thin, pinhole-free Parylene conformal coatings offer beneficial properties, including excellent moisture, chemical and dielectric barrier properties, biocompatibility and biostability, thermal and UV stability, and dry film lubricity. Parylene is a valuable component for devices such as stents, pacemakers, catheters, surgical tools, circuit boards, sensors and LEDs, to name a few.

These half-day seminars introduce Parylene conformal coatings and their beneficial properties for the medical device, electronics, transportation, defense and aerospace industries. An SCS technical specialist will present the seminars, which discuss Parylene conformal coatings as a surface treatment solution for numerous devices.

The seminars are designed for engineers in many disciplines, including R&D, design, manufacturing, quality, materials and electronics, as well as those involved in regulatory affairs and product management. If you are new to Parylene, interested in learning more, investigating solutions for design challenges or currently use Parylene in your products, this seminar is the place to gain knowledge of the latest features and applications of Parylene conformal coatings.

For more information about these free seminars and to register, please visit [www.SCSseminars.com](http://www.SCSseminars.com).

**About Specialty Coating Systems**

Headquartered in Indianapolis, IN, SCS is the worldwide leader in Parylene conformal coating services and technologies. As the direct descendant of the companies that originally developed Parylene, SCS has over 45 years of experience and expertise that it leverages for its customers through coating facilities throughout the Americas, Europe and Asia. The company also offers industry-leading liquid coating systems including spray, spin and dip coating systems and ionic contamination test systems. For more information on SCS, please visit [www.scscoatings.com](http://www.scscoatings.com).
