**Scienscope Introduces New Team Leader for X-ray Division
Danny Lumbreras - U.S. Sales Manager**

Chino, CA — May 2019 — Scienscope International, a leading American supplier of cabinet style micro-focus X-ray systems, announced today that it has added a new position to further enhance its status in the market and highlight its “customer first” strategy.

Assuming the new role of U.S. Sales Manager is Danny Lumbreras. Mr. Lumbreras is a talented sales and process engineer according to Eddy Lin, owner and president of Scienscope. After graduating from college, he first established himself in the automotive industry as both a top performing mechanic and engineer. He then went on to a distinguished career in SMT operations from working as an engineer for prototyping, process and service for SMT components. Lumbreras then continued to further his career as a worldwide capital equipment technical support specialist eventually becoming Scienscope’s new Sales Manager for several territories throughout the United States.

During work within the electronics industry prior to employment at Scienscope, Lumbreras dedicated himself to furthering his knowledge and love for SMT. He took on a role three years ago as a technical support member at Scienscope. Approximately one year ago, Lumbreras was promoted to chief of Scienscope’s Technical Service & Support Team. Scienscope is proud to now have him as the face of their sales team within the United States.

Mr. Lin commented, “We are excited to have Danny take the leading role in the sales management for our outstanding X-ray products. Danny has been with us for three years and has demonstrated a level of professionalism, knowledge and enthusiasm that will allow us to continue to grow and prosper.”

Lumbreras followed Mr. Lin’s comments with, “I am extremely pleased to have this opportunity to promote Scienscope’s innovative and advanced X-ray products with our outstanding, proven team of sales representatives throughout the United States. I, also, see a very bright future for our X-ray component counting products as these systems are among the most exciting in our market and have the potential to dramatically affect the operations of our customers.”

About Scienscope International

Scienscope was founded in 1994 to meet the growing need for reliable and affordable general-purpose optical and video inspection solutions for the electronics and PCB industries. The company began with basic stereo zoom microscopes used for SMT inspection and rework of circuit boards and electromechanical assemblies with a commitment to quality, value and support. Over the past 25 years, Scienscope has evolved to become a complete inspection solution provider, offering both offline and inline X-Ray systems, Video coordinate measurement systems, Video inspection systems, and microscopes to meet a wide variety of applications and manufacturing quality requirements.
