Sono-Tek Corporation Announces the Addition of a New Asia-Based Sr. Technical Sales Engineer

Milton, NY — March 2019 — [Sono-Tek Corporation](#) (OTC BB: SOTK) is pleased to announce the recent hiring of Ronnie Teo, formerly of KIC, as Sr. Technical Sales Engineer. Teo has experience in engineering, service and management, and will provide invaluable support to Sono-Tek's growing Asian customer base. He will support both the sales and service teams for existing and potential customers.

Sono-Tek's Asian market segments include the printed circuit board and semiconductor industries, as well as advanced markets such as fuels cells, medical devices, glass coatings and various nanotechnology research applications. Teo will be based out of Singapore to better serve the company's Asian markets. In addition to his technical background, he speaks Mandarin, English, Cantonese, Japanese and Hokkien. Providing local language support is a key part of Sono-Tek's world-class service and support program.

"Ronnie has an impressive background of technical knowledge and management skills, making his experience a great value to Sono-Tek and our customer base," said Bennett Bruntel, Sono-Tek's VP of Sales and Marketing. "Leveraging his skills and strategic location in Singapore allows superior customer support to our Asian customers. Ronnie will be key to current and future developments to our technology and I am excited to have him as part of our team."

About Sono-Tek Corporation

Sono-Tek is the world leader in the development and application of liquid ultrasonic atomization technology into nozzle systems and spraying and coating application systems. Compared to conventional pressure spraying methods, the company's ultrasonic nozzles do not clog, reduce liquid usage, waste, and environmental impact while achieving much more precise, uniform, thin film coatings. Sono-Tek is continually developing new applications for its unique technology,
