Super PCB Appoints Southwest Systems Technology, Inc.

PLANO, TX — December 2018 — [Super PCB](http://www.superpcb.com), a single source for high quality printed circuit boards (PCBs), is pleased to announce the appointment of Southwest Systems Technology, Inc. as its representative in the states of Texas, Oklahoma, Arkansas, Louisiana and most of Mexico. The company has offices in Texas and Mexico.

Southwest Systems Technology was founded in 1989 and sells products in both the electronic and semiconductor manufacturing industries. The company sells capital equipment, benchtop tools and manufacturing consumables, and its sales engineers are trained in the latest industry processes and technologies.

Super PCB serves the telecom and wireless, transportation, industrial, medical, lighting, consumer electronics, energy and IOT industries. The company offers five-star customer service, superior quality, competitive prices and on-time delivery.

Super PCB provides both PCB prototypes and PCB production. The company offers USA manufacturing to support ITAR requirements and offers overseas manufacturing for low cost mass production. Super PCB's manufacturing facilities are RoHS compliant, ISO 9001 and TS16949 certified, and UL listed. Super PCB's state-of-art facilities and technology ensures the highest quality and efficiency.

"Super PCB is uniquely positioned in the barebaord market to meet the wide range of technologies and delivery deamands that our customer base requires," stated Scott Fillebrown, Managing Director at Southwest Systems Technology. "We are excited to be working with them."
