

## **Trans-Tec America to Resell Aegis' FactoryLogix NPI Software**

**HORSHAM, PA (May 7, 2018)** - Aegis Software, a global provider of Manufacturing Execution System software (MES), announces that Trans-Tec America will include Aegis Software's FactoryLogix® software solution with their line balancing and optimization solution.

Rick McCollough, General Manager, of Trans-Tec America stated, "FactoryLogix provides our customers with the Industry 4.0 Intelligent Factory solutions they require. Starting with superior data preparation and documentation for [NPI \(New Product Introduction\)](#) - this fully integrated solution can also lead to a path to full MES providing component level traceability on YAMAHA IM machinery."

"Aegis is very proud to be a critical part of the software offering via this partnership," said Jason Spera, CEO of Aegis Software. "Trans-Tec America and Aegis share our mutual customers' requirements for Industry 4.0. FactoryLogix enables manufacturers to adapt quickly to dramatically shorten time-to-market and maximize efficiency. We look forward to working collaboratively with these companies as they seek to achieve ongoing productivity enhancements in other areas of the factory, that may also extend beyond NPI."

### **About Trans-Tec**

Founded in 1988, Trans-Tec provide comprehensive sales, distribution and service for Yamaha industrial and SMT products throughout North America, including the full range of Yamaha SMT equipment in the United States and Mexico. TransTechnology Worldwide now operating out of 41 locations in 11 countries, has long been established as a worldwide leader in sales, distribution and after-market service for a full line of electronic manufacturing equipment. The SMT service team is geographically dispersed to ensure rapid SMT service with over half of the Trans-Tec workforce is dedicated to providing outstanding service.
