**Saint-Egrève, France, May 2017** — Vi TECHNOLOGY, a leading provider of inspection solutions for PCB assembly, is pleased to announce that Green Circuits Inc. ([www.greencircuits.net](http://www.greencircuits.net)) has continued its technical advancements with the selection of the entire Vi TECHNOLOGY suite of AOI, SPI, and Process Management solutions. Green Circuits is a leader in full service contract manufacturing in the heart of Silicon Valley.

With the addition of Vi TECHNOLOGY's Spectro Series AOI, PI Series SPI, and SigmaLink Process Management software, Green Circuits continues to take the actions necessary to maintain its position as the premier EMS provider for OEM customers seeking best-in-class manufacturing of low to medium volume production.

In discussing their decision, Ted Park, President and Founder of Green Circuits commented: "Adding the advanced technology of PI PRIMO (SPI), Spectro 5K (AOI) and the SIGMA Link Process Management Software Suite, the Vi TECHNOLOGY complete solution allows us to quickly diagnose each defect, understand its precise cause, and take appropriate corrective actions leading to true continuous improvement. These tools will help Green Circuits maintain its position as the valley's leading contract manufacturer whose customers can count on Green Circuits to deliver world-class, quality products."

Vi TECHNOLOGY is a leading supplier of Optical Inspection Solutions in support of PCB assembly. For more information about Vi TECHNOLOGY, visit [www.vitechnology.com](http://www.vitechnology.com).

**About Vi TECHNOLOGY**

Vi TECHNOLOGY is a global designer, manufacturer and supplier of a wide range of innovative inspection equipment and software solutions for PCB assembly. Vi TECHNOLOGY serves very demanding market segments including telecoms, consumer, computer, automotive, infrastructure, industrial and medical.
