Aegis Software Announces Partnership With Seica Italy, Taking Digitalization in Europe Forward

Erlangen, March 2018 -- Aegis Software, a leading supplier of digitalized factory MES systems, is delighted to announce its partnership with SEICA Italy, a global supplier of intelligent automatic test equipment and selective soldering systems, consolidating Aegis' and Seica's mutual vision to support Italian and EU government-driven environment sustainability and Industry 4.0 digitalization initiatives.

SEICA is a progressive company with a strong digital vision for Industry 4.0, providing a complete range of connected manufacturing equipment solutions that provide unique value into diverse market sectors. The combination of Aegis FactoryLogix digital MES software and Seica equipment is the perfect way to deliver true digital innovation into the market, with a focus on energy management, production efficiency, and sustainability.

"Industry sectors such as telecommunications, automotive and IT, to medical and avionics are urgently looking for digitalized solutions that enable them to reach the next level of manufacturing performance with Industry 4.0, and as such, Seica is the perfect company to act as a representative for Aegis and its expanding customer base in Italy" said Stephan Häfele, Senior Director of Sales and Business Development for Aegis Software.

Aegis attaches great importance to providing its customers with exceptional sales and service support ensuring the reliability and quality of its products. This partnership will ensure that customers with a requirement for true Industry 4.0 and energy management solutions, integrating digitalized engineering, manufacturing, quality and supply chain, particularly where the demands for compliance, control and traceability are essential, will be well catered for.

"The partnership with Aegis allows us to offer the unique solution that the industry needs, the right combination of hardware and software for the next generation of digital factories with environment awareness," stated Antonio Grassino, President of Seica.
