

Data I/O Wins 35th Industry Award

2020 SMT China Vision Award marks 35th award in 10 years.

Redmond, WA, August 2020 – Data I/O Corporation (NASDAQ: DAIO), the leading global provider of advanced data and security deployment solutions for flash, flash-memory based intelligent devices and microcontrollers, announces that it was awarded a 2020 SMT China Vision Award in the category of Device Programming for its PSV2800. The award was presented to the company during an Aug. 26, 2020 ceremony that took place during NEPCON Asia in Shenzhen.

“We are excited to receive the 2020 SMT China Vision Award for best in class device programming for the PSV2800,” said Anthony Ambrose, President and CEO, Data I/O Corporation. “China electronics manufacturers produce billions of devices each year for the industrial controls, Internet of Things, medical and automotive markets. Electronic manufacturers need a high-speed and reliable automated programming solution to meet stringent quality, volume and cost requirements. The PSV2800 is an ideal fit for these dedicated high-volume applications providing customers with Data I/O’s industry leading performance and reliability at the lowest total cost of ownership.”

The PSV2800 is rated at >3000 devices programmed per hour and uses three independent pick-and-place gantries moving in a coordinated motion for fast and precise placement. Engineered to handle devices as small as 2 mm x 3 mm in a tape to tape configuration, the PSV2800 integrates Data I/O’s trusted FlashCORE III programming technology for 24 programming sites in a compact footprint. An ultra-fast high-performance automated programming system, the PSV2800, delivers industry leading reliability for dedicated high-volume applications at the lowest total cost of ownership.

Existing Data I/O customers can leverage their installed base of FlashCORE III adapters, software, and algorithms with the PSV2800. All customers are supported by Data I/O’s award-winning global service and support network comprising over 60 trained field service and support engineers.

SMT China magazine launched the SMT China Vision Awards in 2007 to recognize both international and domestic providers of SMT equipment, materials, software and services that have made outstanding contributions to the rapid growth of China's electronics manufacturing industry by their inventions and innovations.

Learn how to maximize your production throughput and future-proof your capital equipment investment with Data I/O's programming solutions. For more information, visit www.dataio.com/PSV2800.

About Data I/O Corporation

Since 1972, Data I/O has developed innovative solutions to enable the design and manufacture of electronic products for automotive, Internet-of-Things, medical, wireless, consumer electronics, industrial controls and other electronics devices. Today, our customers use Data I/O security deployment and programming solutions to reliably, securely, and cost-effectively bring innovative new products to life. These solutions are backed by a global network of Data I/O support and service professionals, ensuring success for our customers. For more information, please visit www.dataio.com.
