

Next week, much of the industry will congregate in Rosemont for ATE expo and SMTAI.

ETC will be in support of the following exhibitors at ATE expo.

Here are a few of our exhibitors that will be attending.

If you would like to set up a time to visit one of our booths please click on the following: Jeglum@Ameritech.net

If you would like to attend as a visitor preview please click on the following:

AMISTAR Booth 5631

Leading OEMs and EMS Providers recognize Amistar as an innovator with superior customer support practices. With a growing installed customer base and machine installations numbering in the thousands worldwide, Amistar's product offering now includes leading-edge solutions for quality controlled data delivery by [automated labeling](#) of electronic products and components [Amistar DataPlace model LCL](#), and [100LP](#) label placers. Amistar has the distribution in North America of the world class I-Pulse Surface Mount Assembly pick and place equipment.

The [I-Pulse M-2](#) and the [I-Pulse M4e](#) [{Specifications}](#) along with the [M-CUBE](#) is sold and serviced by Amistar.

BEAMWORKS Booth 5614

BeamWorks [Spark 400](#) is an All In One Assembly System that performs an Automated Selective Assembly and rework by Dispensing Paste, Placing Components, Laser Soldering and Inspection (Concurrently). Quick turn prototype assembly, Pilot and small run lot production, makes this one machine is a Complete SMT Assembly Line for Engineering Labs. BeamWorks [Spark 100](#) is a Selective Soldering unit for the soldering of thru-hole assembly by dispensing solder and laser soldering. Pass Thru or stand alone systems.

[EUNIL CO., LTD](#) Booth 5018

Eunil is truly the World Wide Leader in PCB handling equipment. The SMT PCB handling modules and total solution to inline main equipment like the chip shooter, screen printer and reflow oven of SMD process. The Semicon equipment mainly provides the loading and unloading system of BGA AND WAFER in the semicon process. The Customized equipment mainly provide the multiple and special function according to customer's request in order to meet the demand of variable SMT market. Total reliability and compact design are to minimize the need for service. A trial operation, of the system at the factory, is made to ensure everything works as designed and meet and exceeds the specifications of our clients. You can call our headquarters 24/7 for the best possible service in the fastest way.

[QUALITEK INTERNATIONAL](#) Booth 5719

Qualitek International distributes the complete line of [JT Lead-Free soldering equipment](#) Lead-Free validation Source system [LeadTracer](#) a unmatched performer for detecting lead. We also provide professional support services including: Soldering equipment, technology information and equipment sales. We offer Lead-free soldering technology, process application assistance and chemistry consultation. This global presence has allowed Qualitek to offer quick turnarounds and unsurpassed customer support for over 25 years. Throughout our history, Qualitek has positioned itself at the forefront of technological innovation. There is [full technical support, maintenance and repair services](#) along with operator training and Genuine JT spare parts supply.

[JT Lead Free Wave Soldering System](#)
[Qualitek QW300 Lead Free Wave Solder Machines](#)
[ZEO Wireless Inspection Camera](#)
[LeadTracer+](#)

[UMG TECHNOLOGIES INC.](#) Booth 5435

UMG is a supplier of capital equipment to the electronic assembly market. Specializing in assembly interconnect machinery with a focus on odd-form insertion, terminal, pin, eyelet, bulk wire, laser marking and continuous mechanical connector insertion systems for us in the consumer electronic, automotive, electronic manufacturing services, telecommunications and aerospace industries. They manufacture from a manual machine to a full automatic systems. The machines are rugged and dependable, yet simple to operate and maintain.

We manufacture standard and custom interconnection assembly equipment.

[Semi-Automatic 788 Bench Top Eyelet Inserter](#) [Air-Operated AE-2000 Bench Bobbin Terminal Inserter](#)
[Air-Operated Bench Staking Press](#) [Semi-Automatic AE-2001 Bulk Eyelet](#)

Bench Top Inserter

Air-Operated BP10000 Bench Press

Semi-Automatic Anvil-Actuated

BTI-5000 Terminal Inserter

Semi-Automatic MD-838 Bulk Pin BenchTop

Inserter

Model PLT-901 Bulk Wire Inserter

Model PLT-901 Inline Bulk Pin Inserter

Model PLT-901 Inline Tab Inserter

The Flexible PLT-901 XYR Platform

PLT-901 Flowline

Axial Thru-Hole Platform Model: VCD-H

Axial Sequencer Machine Model: SEQUENCER-H
